

ASIDE – USABILITY CHANGE

Posted on 2017-01-22 by spd_wp_admin

Dear Reader,

I have nothing new today, except some small modifications to how this site is structured. The visitor counters suggested that visitors were not going beyond the Welcome page. Those same counters also suggested that I should not introduce new photographs to the gallery page. With those 2 findings in mind, the photography blog is now the site landing page. As well, I have placed the photos you may have missed from yesterday into today's gallery.

Cheers, spd

I had missed them. Now I haven't, and that's a good thing. Great shots!
