

A POT, A FLOWER, AND A SKY

Posted on 2017-06-25 2019-12-16 by spd_wp_admin

Dear Reader,

Though I have not shared anything with you for a while I have been busy. Here are 3 recent ones. Unfortunately, the sky photo does not have the sharpness and range I like. Despite its flaws, it still though has merit. I had been playing with the jpeg format and had not switched back to raw – ah silly me. We live and learn (sometimes).

The sky can be tricky. I wouldn't stress about stress about the clouds being sharp, unless it's that kind of image. Comes with the territory and all. Practice sharp on flower petals. (Funny I mention that, huh?)
